**TRAINING AND EMPLOYMENT GUIDANCE LETTER NO. 31-09**

**TO:** STATE WORKFORCE AGENCIES  
STATE WORKFORCE ADMINISTRATORS  
NATIONAL FARMWORKER JOBS PROGRAM GRANTEES  
INDIAN AND NATIVE AMERICAN PROGRAM GRANTEES

**FROM:** JANE OATES  
Assistant Secretary

**SUBJECT:** Program Year 2009/Fiscal Year 2010 Performance Reporting and Data Validation Timelines

**1. Purpose.** To inform and remind the workforce investment system of the performance reporting requirements and associated timelines for submitting quarterly and annual reports and data validation results for the Workforce Investment Act (WIA) title IB programs and National Emergency Grants (NEG); Wagner-Peyser Act Employment Service; activities authorized under chapter 41 of title 38 United States Code (Local Veterans' Employment Representative and Disabled Veterans' Outreach Programs); the Trade Adjustment Assistance (TAA) program; the Indian and Native American Program (INAP); and the National Farmworker Jobs Program (NFJP). Furthermore, this guidance announces a modification to the Source Documentation Requirements for Program Year (PY) 2009 WIA Data Element Validation.

**3. Performance Reporting and Data Validation for the WIA Title IB Programs.** For Program Year (PY) 2009, each state is required to make the following submissions for WIA to the Employment and Training Administration (ETA):

**A. A validated WIA Annual Report (ETA 9091 - OMB No. 1205-0420) – Due no later than October 1, 2010.**

Please note that states are required to complete report validation prior to submitting the annual report Tables A-O (ETA 9091) to ETA through the Enterprise Business Support System (EBSS) on, or before, October 1, 2010. Submission of timely and accurate data is required in section 136 of WIA. Furthermore, a timely and validated annual report is one of the criteria for incentive eligibility. See TEGL 9-07 for further clarification.

Data element validation, using the file of exiters and participants reported on the ETA 9091, must be submitted by February 1, 2011. Please see Attachment A of this TEGL for the source documentation requirements for PY 2009 WIA data element validation.

States that are approved to report only the common performance measure outcomes for WIA programs for PY 2009 (Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, South Carolina, Tennessee, Texas, Utah, Virginia, Virgin Islands, West Virginia, Wisconsin, and Wyoming) do not have to report outcomes for the customer satisfaction measures, the credential measure for Adults and Dislocated Workers, or the Older and Younger Youth measures on the WIA Annual Report. These states, along with all other states, are to report outcomes for the youth common performance measures.

States that are approved to report only the common performance measure outcomes should reference Attachment B of this TEGL, which contains the WIA Annual Report format with strikeouts to indicate the information that is *not* required as part of the state's annual report submission.

**B. A WIA Annual Report Narrative – Due no later than October 1, 2010.**

States should e-mail electronic copies of their narrative annual report to [WIA.AR@dol.gov](mailto:WIA.AR@dol.gov) and their Regional Administrator. Guidance in TEGL 14-00, Change 3, *Workforce*

*Investment Act (WIA) Annual Report Narrative* specifically identifies those required portions that states must provide as well as those portions that states are encouraged to provide.

TEGL 14-00, Change 3, required that each state describe how its waivers have changed the activities of the state and local areas, and how activities carried out under the waivers have directly or indirectly affected state and local area performance. ETA will continue to monitor states' compliance with this requirement.

### C. The WIA Standardized Record Data files – Due no later than September 15, 2010.

There are significant changes to the frequency and content of the WIA Standardized Record Data (WIASRD) file submissions. In accordance with TEGL 24-08, grantees are now required to submit the WIASRD file for both participants and exiters on a quarterly basis. The first quarterly submission was due 45 days following the end of the third quarter of PY 2009, which ended on March 31, 2010. The deadline for this submission was May 17, 2010. Please refer to the Quarterly WIASRD Reporting TEGL No. 17-09 for an in-depth discussion of these changes.

A number of states have used the Data Reporting and Validation System (DRVS) to prepare their annual WIASRD file for final submission to ETA. When a state uploads individual records into DRVS, the system not only validates the data by checking for data entry errors, missing values, and inconsistencies between fields, but also automatically selects and formats the data for uploading into EBSS. However, the export routine in DRVS removes and modifies the data before producing a WIASRD file for uploading into EBSS.

Since DRVS is not being modified to allow for the exporting of participant records, **states should not use DRVS to produce their quarterly WIASRD files.** Instead, ETA has modified EBSS to allow states to submit their individual records directly to the system based on the current specifications for uploading data into DRVS. EBSS has conducted edit checks based on updated specifications for the WIASRD edit checks and valid value requirements. All edit checks and valid value requirements are fully articulated in Attachments A through E of TEGL 17-09.

There are several ways in which the quarterly submission of WIASRD files will be unique. These modifications are explained in sections 4.A – 4.D of TEGL 17-09:

- The submission will include data fields previously not accepted by EBSS.
- The submission will include data on all participants who have not exited. To accommodate this participant data, some WIASRD fields have required values for participants without exit dates.
- There are changes to the technical process of uploading individual record files into EBSS.
- States will submit to ETA the individual record files for participants who receive “self and informational services only” (here after referred to as self-service only participants).

WIASRD quarterly submissions for the first, second, and third quarters of each Program Year are due **45** days following the end of the quarter. The due date for the fourth quarter of

each Program Year is 75 days following the end of the quarter. This additional time provides states with the opportunity to better align their fourth quarter WIASRD data with their WIA Annual Report data due no later than October 1st of each year. States have an additional 15 days following the due date to address data errors; WIASRD files are locked from editing after this period. Should the due date fall on a Saturday or Sunday, the quarterly WIASRD file is due the following Monday.

Similar to the annual submission of individual records, the quarterly WIASRD submission will be used to compute certain performance measures. Therefore, the lagged cohorts to be included in the quarterly submission must correspond to the cohorts in the annual submission. In practical terms, states will be submitting an annual report on a quarterly basis. Therefore, states will no longer be required to submit an annual WIASRD file. The PY 2009 Q4 WIASRD file will act as the PY 2009 WIASRD annual file. Furthermore, Data Element Validation will only be performed on an annual basis using the fourth quarter WIASRD file.

Please note the following items when generating and submitting WIASRD files:

- WIASRD item 309 (Incumbent Worker (Statewide 15% Activities)), has been updated to allow states to track Incumbent Workers who received local formula funds or Rapid Response funds. Please note the changes in the field description and valid value requirements for this item.
- WIASRD item 326 (Other Non-WIA Programs) includes new valid values to allow states to code American Recovery and Reinvestment Act of 2009 co-enrollments.
- Please ensure that WIASRD item 342 Occupational Skills Training Code is completed; O\*NET codes are available at <http://online.onetcenter.org/>.
- Please ensure that WIASRD item 619, Type of Recognized Credential, is completed for each individual who has earned a credential, certificate, or degree.
- If the exiter was a Workforce Innovation in Regional Economic Development (WIRED) or Military Spouse Career Advancement Account (CAA) funded recipient, item 313c should contain the appropriate WIRED or CAA grant number.
- The most common WIASRD data problems are missing or incomplete information in the service items that were added in PY 2005 and on the occupation of the training program. The service items that were added in PY 2005 included the following:
  - Received disaster relief assistance
  - Received Core Self-Services and Informational Activities
  - Date of first staff assisted core service
  - Received Workforce information services
  - Date completed or withdrew from training
  - Received prevocational activities
  - Enrolled in education
- The occupation of the job held in the quarter after exit is frequently missing. States are encouraged to collect this data when providing follow-up services, as it is not available in wage record data.

In addition to these items, ETA has developed Attachment C of this TEG, which contains a list of common errors identified during the analysis of WIASRD submissions from previous

years. States should contact ETA's National Office at [ETAperforms@dol.gov](mailto:ETAperforms@dol.gov), with the subject line of **WIASRD submission**, if they need additional assistance.

Please visit <http://www.doleta.gov/performance/reporting> for the most recent WIASRD file format.

**Please note that in addition to the annual reporting requirements enumerated in sections A-C above, states must also submit Quarterly and Supplemental Monthly Reports to ETA through EBSS.**

As described in TEGL 24-08, states are required to submit supplemental reports for WIA Adults, Dislocated Workers, and Youth programs, National Emergency Grants (NEG), and Wagner-Peyser Employment Service and Reemployment Services Grants for reporting under the American Recovery and Reinvestment Act.

#### **4. Performance Reporting and Data Validation for Other State-Based Programs.**

**Wagner-Peyser Employment Service.** States are required to submit the ETA 9002 and VETS 200 reports (OMB No. 1205-0240) on a quarterly basis. **States must submit their PY 2009 fourth quarter reports no later than August 31, 2010.**

The fourth quarter PY 2009 Wagner-Peyser Employment Service submission requires report validation and minimal data element validation. **Data element validation must be completed for the ETA 9002 and VETS 200 reports prior to submitting the final fourth quarter reports by the August 31, 2010, due date.** A minimal data element validation sample of 25 job seekers must be reviewed and compared to state-level data prior to submitting the ETA 9002 and VETS 200 reports to ensure that the files used to conduct report validation were properly constructed. Although DRVS is not being modified to export the modified WIASRD file, DRVS will still be able to conduct data element validation procedures. All states are still required to perform data element validation using the DRVS. Also, all states are required to submit their summary and analytical reports for data element validation through the EBSS.

**Trade Adjustment Assistance (TAA).** States are required to submit the Trade Act Participant Report (TAPR) on a quarterly basis, no later than 45 days after the end of the report quarter. The fourth quarter TAPR for Fiscal Year (FY) 2010 is due no later than November 15, 2010. States administering TAA programs are not required to submit an annual report; states are required to submit individual participant records only for TAA. Therefore, states are not required to conduct report validation, but must conduct data element validation on the cumulative file of four quarters of the FY 2010 TAPR (created by adding the four quarterly files together). DRVS will not be available to perform data element validation on the FY 2010 TAPR file because DRVS has not been modified to accommodate changes in TAPR formatting. ETA is investigating other methods for performing data element validation. Contingent on the completion of a new system, data element validation for TAA must be submitted to ETA by February 1, 2011. Please see Attachment D of this TEGL for the source documentation requirements for FY 2010 TAA data element validation.

**5. Data Validation for the National Farmworker Jobs Program (NFJP).** Grantees administering the NFJP are not required to submit a performance outcomes report. Grantees are required to submit individual participant records for the NFJP, which are used by ETA to calculate the performance outcomes for each grantee. Therefore, grantees are not required to conduct report validation, but must conduct data element validation.

The final NFJP participant data for PY 2008 (participants with exit dates between 7/1/2008 and 6/30/2009) were due to ETA's contractor (Social Policy Research Associates) on May 15, 2010. **Data element validation for PY 2008 must be submitted to ETA by November 2, 2010.** Please see Attachment E of this TEGL for the source documentation requirements for PY 2008 NFJP data element validation. NFJP grantees should use NFJP Data Validation Software Version 2.0.

**6. Indian and Native American Program (INAP) Reporting.** Grantees administering the INAP are not required to submit a performance outcomes report. Grantees are required to submit individual participant records for the INAP, which are used by ETA to calculate the performance outcomes for each grantee.

**7. Data Reporting and Validation Resources.** ETA provides several resources to states in order to assist them in reporting timely and accurate data. As previously mentioned, one of the criteria for incentive eligibility is that the data used to compute the performance outcomes must be submitted on time and be accurate.

WIA Annual and Quarterly Report handbooks are available at:  
<http://www.doleta.gov/performance/reporting>

Data validation software applications and User Guides for each program are at:  
[http://www.doleta.gov/performance/reporting/tools\\_datavalidation.cfm](http://www.doleta.gov/performance/reporting/tools_datavalidation.cfm)

Data Reporting and Validation System (DRVS) version 7.2 was released on May 6, 2009. DRVS 7.2 allows states to calculate their WIA PY 2009 Annual Report and WIA and Wagner-Peyser 2009 quarterly reports. As mentioned in section 3.C and 4, DRVS will not be available to export a final WIASRD file. However, DRVS will continue to be able to perform data element validation. States are still required to perform data element validation using the DRVS and to submit their summary and analytical reports through the EBSS.

## **8. Changes to the Required Source Documentation.**

There is a change to the source documentation requirements for DRVS Field #3, 'Date of Birth.' The allowable documents for 'Date of Birth' will now be aligned with the level of service, such that a hard or electronic copy of the participant's I.D. will only be required for a participant that receives intensive and/or training services. The following source documentation requirements are also included in Attachment A of this document.

- For participants participating in self-service only activities, self-attestation is acceptable.
- For WIA Adult, Dislocated Worker, and NEG participants receiving staff-assisted core services only, the hard or electronic case notes should reflect that the client has shown

proof of age. The notes should include, for example, the driver's license number or other uniquely identifiable information of the document.

- For all WIA Youth program participants and WIA Adult and Dislocated Worker/NEG participants receiving intensive and/or training services, a hard or electronic copy of the participant's I.D. must be kept in the case file. The I.D. should be one of the following: driver's license, baptismal record, birth certificate, DD-214, Report of Transfer or Discharge paper, Federal, state or local identification card, passport, hospital record of birth, public assistance/social service records, school records or ID cards, work permit, cross match with Department of Vital Statistics, or tribal records.

**9. Training and Technical Assistance.** States and grantees are encouraged to request technical assistance on validation procedures and the use of the reporting and validation tools by contacting Regional and/or National Office program staff.

**10. Action Requested.** States and grantees should: 1) distribute this guidance to the appropriate staff; 2) complete report and data validation activities within the timeframes established in Sections 3, 4 and 5 of this guidance; and 3) provide the appropriate Regional Office with updates on the reporting and validation process.

**11. Inquiries.** Questions regarding performance reporting should be directed to the appropriate ETA Regional Office, or directed to Karen Staha at [staha.karen@dol.gov](mailto:staha.karen@dol.gov) (202-693-2917) in the Division of System Accomplishments, Office of Policy Development and Research.

## **WORKFORCE INVESTMENT ACT DATA ELEMENT VALIDATION INSTRUCTIONS AND SOURCE DOCUMENTATION**

Validation Instructions: These instructions present the data elements, reference numbers, formats, element definitions, Federal sources, state/grantee sources, and validation rules needed to perform data element validation. The Federal sources are the generic, federally recommended source documentation. The "State Sources" column can be used to enter state-specific versions of the federally approved documentation.

### **A. VALIDATION RULES**

Two types of validation rules exist:

1. If the validation instruction says MATCH: Enter a checkmark in the box in the pass column if the data on the worksheet match the data in the source documentation. Enter a checkmark in the box in the fail column if the data on the worksheet do not match the data in the source documentation or if no source documentation is found.

To match, the data on the worksheet must be the same as the data in the source documentation. For example, if the worksheet says a participant's date of birth is July 1, 1975, then the source documentation must also have July 1, 1975, as the birth date.

The validator must validate data elements that have checkboxes next to them or are not grayed-out.

2. If the validation instruction says SUPPORT: Enter a checkmark in the box in the pass column if the data on the worksheet are supported by the data in the source documentation. Enter a checkmark in the box in the fail column if the data on the worksheet are not supported by the data in the source documentation or if no source documentation is found. To support the data on the worksheet, the source documentation must provide evidence that the data on the worksheet is correct.

This instruction is used when information must be interpreted or processed before it can be used to assess the accuracy of the data on the participant's records. For example, source documentation is used to support youth who needs additional assistance because validators must interpret policy and determine if the documentation supports that policy.

## **B. MISSING AND INVALID RECORDS**

There are four conditions used to describe higher level data problems:

1. If a record is missing from the office in which it is supposed to be, the validator should check the box at the top of the worksheet that says "Missing Record." No other elements should be validated.
2. If the validator cannot determine where a record is supposed to be located, the validator should check the box at the top of the worksheet that says "Unable to Locate." No other elements should be validated.
3. If a record for a person not registered in WIA has wrongly been included in the extract file, the validator should check the box at the top of the worksheet that says "Invalid Record." No other elements should be validated.
4. If a record has a wrong Social Security Number (SSN), the validator should check the "Wrong SSN" checkbox AND validate all data elements listed on the worksheet.

## **C. TYPES OF SOURCE DOCUMENTATION**

For most data elements, the validation instructions provide multiple forms of acceptable source documentation. Ideally, all source documentation should tell the same story regarding the participant, services rendered, and outcomes. However, if the state collects multiple sources for the same data element and the sources conflict, the most reliable source should be used to determine if the element passes or fails. For example, for School Status at Participation (DRVS Field# 30), copies of records from an educational institution are a more reliable source than participant self-attestation.

For the most part, the definition of a particular source is clear. States have, however, had questions about four sources – Cross-Match, State Management Information System (MIS), Self-Attestation, and Case Notes. Definitions for these four types of source documentation are:

1. **Cross-Match:** A cross-match requires validators to find detailed supporting evidence for the data element. An indicator or presence of an SSN in a non-WIA database is not sufficient evidence. For example, Temporary Assistance to Needy Families (TANF) participation can be determined by a cross-match with the state's public assistance database. It is not sufficient to find that the sampled SSN is present in the public assistance database; validators must also find supporting information such as dates of participation and services rendered.

2. State MIS: Unless otherwise noted, state MIS refers to specific, detailed information that is stored in the state's information system that supports an element. An indicator, such as a checkmark on a computer screen, is not acceptable source documentation in and of itself. For example, state MIS is an acceptable source documentation for date of first training service. To be an acceptable source to validate date of first training service, in addition to the date of first training, the state MIS should have information about the type of training and the organization that provided the training. This detailed information makes valid source documentation and makes it unnecessary for such states to validate this data element in local offices.
3. Self-Attestation: Self-attestation occurs when a participant states his or her status for a particular data element, such as pregnant or parenting youth, and then signs and dates a form acknowledging this status. The key elements for self-attestation are: (a) the participant identifying his or her status for permitted elements and (b) signing and dating a form attesting to this self-identification. The form and signature can be on paper or in the state management information system, with an online signature.
4. Case Notes: Case notes refer to either paper or electronic statements by the case manager that identifies, at a minimum, the following: a participant's status for a specific data element, the date on which the information was obtained, and the case manager who obtained the information.

**PLEASE NOTE:** For DRVS field numbers 3, 12, 16, 21, 21, 22, and 24, the sources differ for those adults, dislocated workers, and NEG's, where applicable, who received intensive and/or training services from those who received staff-assisted services only. If a date is in field # 68 or 69, the participant received intensive and/or training services.

**COMMON WORKFORCE INVESTMENT ACT STANDARDIZED  
RECORD DATA (WIASRD) REPORTING ERRORS**

This attachment includes typical WIA Standardized Record Data (WIASRD) submission errors that ETA has identified. Please ensure accurate and complete data submission.

- Not reporting disability status (Item 104) for many individuals: should be 1 or 2, not 0 or blank for almost everyone.
- Not reporting Hispanic (Item 105) for many individuals.
- Not reporting Recently Separated Veteran (Item 114) for many veterans.
- Incorrect reporting of high school graduates in Highest Grade Completed (Item 119). High school graduates should be reported using code '87'. Code '12' should be used only for those who completed the 12<sup>th</sup> grade but did not graduate.
- Not including Food Stamps recipients in Other Public Assistance Recipient (Item 121). The definition of this field was changed for PY 2005 to include Food Stamp recipients.
- Not reporting the Date of Actual Qualifying Dislocation (Item 125) for many dislocated workers.
- Not reporting adult characteristics for all or many individuals.
  - Homeless (Item 125).
  - Offender (Item 126).
- Incorrect reporting of Employment and Training Programs Related to Food Stamps (Item 325). This field is not used for reporting receipt of Food Stamps (which is included in Item 121). Item 325 is to be used only for those who received employment and training services funded by the Food Stamps program.
- Not reporting new service fields:
  - Core self-service and informational activities (Item 331).
  - Date of first staff-assisted core service (Item 332).
  - Workforce information services (Item 333).
  - Date completed, or withdrew from, training (Item 336).
  - Prevocational activities (Item 339).
- Incorrect reporting of enrolled in education (Item 343).
  - Should generally be 'yes' if a youth was in school at either participation (Item 129) or exit (Item 670).
- Not reporting wages in the quarter before registration (Item 614).

- Not reporting wages before registration (Items 612 to 614) for persons who exit after the exit cohort for average earnings or earnings change.
- Not reporting education status at exit (Item 670) for youth.
- Incorrect reporting of youth activities. Almost all youth should have at least one youth activity reported. Several states report a large number of youth without any youth activities. One state does not report any youth activities at all.
- Incorrect reporting of NEG participants.
  - Not providing records for all NEG participants. All participants enrolled in a NEG project must be reported in the WIASRD, regardless of whether or not they were coenrolled in Title 1b programs.
  - Incorrect reporting of the NEG Project ID (Items 313a to 313c). A NEG project ID must be entered for each NEG participant. This number is found in the NEG Grant Award package. If the participant is enrolled in more than one NEG, all applicable NEG project IDs should be entered in the participant's record. The NEG project ID is the state postal code followed by a two-digit number. For example, a valid code for a project in Utah would be UT02.

**SOURCE DOCUMENTATION REQUIREMENTS FOR FISCAL YEAR  
(FY) 2010 TAA DATA ELEMENT VALIDATION**

# *Trade Adjustment Assistance Data Element Validation Instructions*

*Validation Instruction: These instructions present the data elements, reference numbers, formats, element definitions, federal sources, state/grantee sources, and validation rules needed to perform data element validation. The federal sources are the generic, federally recommended source documentation. The "State/Grantee Sources" column can be used to enter state-specific versions of the federally approved documentation.*

## *VALIDATION RULES*

*Two types of validation rules exist:*

*1. If the validation instruction says MATCH: Enter a checkmark in the box in the pass column if the data on the worksheet match the data in the source documentation. Enter a checkmark in the box in the fail column if the data on the worksheet do not match the data in the source documentation or if no source documentation is found.*

*To match, the data on the worksheet must be the same as the data in the source documentation. For example, if the worksheet says a participant's date of exit is July 1, 2002, then the source documentation must also have July 1, 2002 as the exit date. The validator must validate all data elements that have checkboxes next to them.*

*2. If the validation instruction says SUPPORT: Enter a checkmark in the box in the pass column if the data on the worksheet are supported by the data in the source documentation. Enter a checkmark in the box in the fail column if the data on the worksheet are not supported by the data in the source documentation or if no source documentation is found.*

*To support, the data on the source documentation must provide evidence that the data on the worksheet are correct. This instruction is used when information must be interpreted or processed before it can be used to assess the accuracy of the data on the participant records. For example, source documentation can support waiver from training requirement.*

## *MISSING AND INVALID RECORDS*

*There are four conditions used to describe higher level data problems:*

*1. If a record is missing from the office in which it is supposed to be, the validator should check the box at the top of the worksheet that says "Missing Record." No other elements should be validated.*

*2. If the validator cannot determine where a record is supposed to be located, the validator should check the box at the top of the worksheet that says "Unable to Locate." No other elements should be validated.*

*3. If a record for a person not registered in TAA has wrongly been included in the extract file, the validator should check the box at the top of the worksheet that says "Invalid Record." No other elements should be validated.*

*4. If a record has a wrong Social Security Number (SSN), the validator should check the "Wrong SSN" checkbox AND validate all data elements listed on the worksheet.*

## ***TYPES OF SOURCE DOCUMENTATION***

*For most data elements, the validation instructions provide multiple forms of acceptable source documentation. If the state collects multiple sources for the same data element and the sources conflict, the most reliable source should be used to determine if the element passes or fails. For example, for Employed in first full quarter after exit (Ref# 11) UI wage records are more reliable than supplemental data sources. Validators should use their best judgment when deciding the most reliable source to validate an element.*

*For the most part, definition of a particular source is clear. States have, however, had questions about three sources -- Cross-Match, State Management Information System (MIS), and Case Notes. Definitions for these elements are:*

- 1. Cross-Match: A cross-match requires validators to find detailed supporting evidence for the data element. An indicator or presence of an SSN in a non-TAA database is not sufficient evidence. For example, veteran status can be determined by a cross-match with the veteran's database. It is not sufficient to find that the sampled SSN is present in this database; validators must also find dates of service, separation, and discharge information.*
- 2. State MIS: Unless otherwise noted, state MIS refers to specific, detailed information that is stored in the state information system that supports an element. An indicator, such as a checkmark on a computer screen, alone is not acceptable source documentation. For example, state MIS is acceptable source documentation for date entered training. To be an acceptable source to validate this date, in addition to the date of first training, the state MIS should have detailed information about the type of training and the organization that provided the training. This detailed information makes valid source documentation and makes it unnecessary for such states to validate this data element in local offices.*
- 3. Case Notes: Case notes refer to either paper or online statements by the case manager that identify a participant's status for a specific data element, the date on which the information was obtained, and the case manager who obtained the information.*

**SOURCE DOCUMENTATION REQUIREMENTS FOR PROGRAM YEAR  
(PY) 2009 NFJP DATA ELEMENT VALIDATION**

This appendix presents the data elements to be validated with their associated WIASPR number, element definitions, valid values, federal validation sources, state/grantee sources, and validation instructions needed to perform data element validation. The federal sources are the generic, federally recommended source documentation. The "State/Grantee Sources" column can be used to enter grantee-specific versions of the federally approved documentation.

Two types of validation rules exist:

1. If the validation instruction cell says MATCH: Enter a checkmark in the box in the pass column if the data on the validation worksheet match the data in the source documentation. Enter a checkmark in the box in the fail column if the data on the worksheet do not match the data in the source documentation or if no source documentation is found. To match, the data on the worksheet must be the same as the data in the source documentation. For example, if the worksheet says a participant's date of birth is July 1, 1975, then the source documentation must also have July 1, 1975 as the birth date.
2. If the validation instruction says SUPPORT: Enter a checkmark in the box in the pass column if the data on the validation worksheet are supported by the data in the source documentation. Enter a checkmark in the box in the fail column if the data on the worksheet are not supported by the data in the source documentation or if no source documentation is found. To support, the data on the worksheet must be similar to the data in the source documentation. This instruction is used when information must be interpreted or processed before it can be applied to the participant's records. For example, source documentation can support farmworker status in different ways, by a code or narrative or other information.

For the most part, the definition of a particular source is clear. Grantees may, however, have questions about three sources—Grantee Management Information System (MIS), Self-Attestation, and Case Notes. Definitions for these three types of source documentation are:

1. MIS: Unless otherwise noted, MIS refers to specific, detailed information which supports an element that is stored in the grantee's information system. An indicator alone, such as a checkmark on a computer screen, is not acceptable source documentation. For example, a grantee's MIS is acceptable source documentation for date of exit if it identifies the last service received in addition to the date on which that service was received.
2. Self-Attestation: Self-attestation occurs when a participant states his or her status for a particular data element and then signs and dates a form acknowledging this status. The key elements for self-attestation are: (a) the participant identifying his or her status for permitted elements and (b) the signing and dating of a form attesting to this self-identification. The form and signature can be on paper or in the state management information system, with an online signature.
3. Case Notes: Case notes refer to either paper or electronic statements by the case manager that identifies, at a minimum, the following: a participant's status for a specific data element, the date on which the information was obtained, and the case manager who obtained the information.
